

PARKING LOT & ROAD SAFETY

2.5" SPEED BUMP

The RubberForm 2.5" Speed Bump is the only free-standing speed bump or permanent rubber speed bump available on the market today targeted for traffic speeds below 10 mph. Without the need to bolt down these units, you can deploy and recover these traffic calming products whenever and wherever you need them. The unique design of these speed bumps means that they will stay in place without the use of stakes, bolts, or adhesives. Simply put them down and link them together! However, the 2.5" Speed Bump is also ideal for permanent applications.

The 2.5" Speed Bumps provide you with 2.5" of solid, 100% recycled rubber which is manufactured to withstand extreme temperatures, constant U.V. light, extreme weather conditions, and of course, high traffic volume. The 2.5" Speed Bump has been repeatedly field-tested to take the abuse and compression of extremely high weight vehicles and high volumes of continuous traffic. These qualities make the RubberForm 2.5" Speed Bumps ideal for temporary traffic stops, parking lots, parking complexes, guarded gate entrances or exits, construction sites, school drop-off or pick-up areas, emergency response situations, or anywhere an effective traffic control device is temporarily or permanently needed.

Easy to deploy! Easy to install! Easy to recover! The 2.5" Speed Bumps come with embedded, high-visibility AASHTO reflectors for use during low-light or night-time conditions. Red/white reflectors are available.

FEATURES

- 100% Recycled Masticated Rubber
- Portable or Permanent - unlimited connectivity
- Manageable size and weight
- Embedded, high-visibility/AASHTO yellow reflectors
- Target slow down speed to 10 mph or below
- Galvanized lag bolt screws and anchors for permanent installation
- Patents pending
- Made in America

SPECIFICATIONS

- 35 lbs
- 2.5" H x 18" W x 36" L
- Masticated recycled rubber
- 2 embedded, highly-visibility AASHTO two-way yellow reflectors
