

PARKING LOT & ROAD SAFETY

4" SPEED BUMP

Without the need to bolt down these speed bumps, one of the most aggressive traffic calming products on the market today can be temporarily deployed and easily recovered whenever and wherever you need them. The unique design of these speed bumps means that they will stay in place without the use of stakes, bolts, or adhesives. Simply put them down and link them together! The RubberForm 4" Speed Bump provides you with 4" of solid, 100% recycled, masticated rubber which is manufactured to withstand extreme temperatures, constant UV light, extreme weather conditions, and of course, high traffic volume. Not recommended for pedestrian use, normal vehicle use not recommended.

Designed to slow traffic to a crawl of 3-5 mph, the 4" Speed Bump has been repeatedly field-tested to take the abuse and compression of extremely high-weight vehicles, including fully-loaded, 74,000 lb tractor-trailers. These qualities make the 4" Speed Bump ideal for temporary traffic stops, guarded gate entrances or exits, construction sites, or anywhere a more aggressive traffic control device is temporarily needed. You have a choice to purchase with or without channel. This speed bump has been successfully used by police and fire departments as well as Border Patrol, Homeland Security, and Military Units for traffic check points. The RubberForm 4" Speed Bump comes with a high visibility, yellow reflective stripe for use during low-light or night-time conditions.

Three units are easily deployed to cover a 9 foot wide traffic lane. More units give you unlimited length and coverage. Designed for extremely high weight vehicles.

FEATURES

- 100% extremely durable, high-quality recycled rubber
- Use for sobriety and police check-points
- Slow-down traffic during fire and auto accident emergencies
- Portable or permanent
- Unlimited connectivity
- High visibility
- Patents pending
- Target slow down speed from 3 to 5 mph
- Made in America

SPECIFICATIONS

- 43 lbs
- 4" H x 18" W x 40" L
- Proprietary masticated recycled rubber
- Yellow reflective strip - both sides
- Available with and without cable hole
