

SHOPPING CART CORRAL BUMP

RubberForm's Shopping Cart Corral Bump was developed with help from some of North America's largest retailers and cart corral companies. Our cart safety bump holds shopping carts in the corral to ensure they do not roll out into parking lot traffic, a parked car, or a shopper. Made with 100% post-industrial recycled EPDM rubber for strength and durability.

The Shopping Cart Corral Bump features a high visibility safety yellow strip with reflective glass beads and tapered ramps on each side that allow shoppers and employees to easily roll carts in and out of the corral as needed. Safety bumps can be secured in place with our Chem-Link M1 glue-adhesive or anchored with rugged structural screws.

Reduce liability and keep your parking lot safe for shoppers by securing your shopping carts in the corral with our cart safety bump.

Key Features

- Enhances safety and minimizes liability from pedestrian, vehicle, and shopping cart incidents
- Tapered ramps on both sides allow carts to be easily rolled into/out of cart corrals
- Easy to install
- All-weather durability – will not chip, crack, spall, or need repainting
- Made in the USA with 100% American post-industrial recycled EPDM rubber
