

PARKING LOT WHEEL STOPS

RubberForm's Next Generation Wheel Stop is engineered to be the only wheel stop your parking lot will ever need. Our patented wheel stop is created from 100% compounded recycled plastic and rubber composite, which means they will not warp, chip, crack, crumble or corrode. This guarantees that RubberForm Wheel Stops will last your business for years to come.

Our Next Generation Wheel Stop features all new patented snap-on polygons that come standard with safety yellow endcaps for increased visibility and safety to ensure your company is protected from liability.

Polygon stripes are not only offered in a variety of five stock or your custom colors, but also customizable with printed company logos — a feature you **will not** find anywhere else.

Key Features

- Easy one-person installation
- Customize polygons – add your logo or brand colors
- 10 drainage channels for a sustainable parking lot
- Made in the USA with 100% recycled materials
- Impact and weather resistant – will not warp, chip, crack, crumble or corrode
