

ENGINEERED TRAFFIC CURBS (ETC)

Our RubberForm Engineered Traffic Curb is an effective temporary or permanent alternative to a concrete curb. Unlike concrete, they're easy to install and just as easy to remove and relocate later. Our 100% American recycled composite material won't crack, crumble, spall, or corrode. And our traffic curbs are carefully innovated to withstand all the extremes of American roads: heat, cold, rain, ice, and snow. And of course, heavy vehicle traffic.

KEY FEATURES:

MADE IN THE USA

With 100% recycled composite material

EASY

To install, remove, and relocate

VERSATILE

For permanent or temporary installation

DURABLE

Will not chip, crack, crumble, or corrode

Made in the USA
