

BOLLARD COVERS

RubberForm Bollard Covers (also known as Bollard Sleeves) are one step toward the best-looking parking lot for miles around. They take the bleak industrial look of concrete-filled and steel bollard posts and make them look fresh and new when you slide on RubberForm's Bollard Cover. Choose a cover that complements your company colors for an excellent branded customer experience from parking to purchase.

Are your existing concrete bollards slightly different heights due to age or warping? No problem! Our bollard covers will slide right over to provide matching height across the board.

KEY FEATURES:

DURABLE

Flexible plastic designed to absorb impact
