

2 INCH SPILL CONTAINMENT BERM

RubberForm's patented 2 Inch Spill Containment Berm mechanically isolates areas and contains spills without resorting to immovable concrete barriers, angle iron or culverts, and expensive construction costs. It keeps you, your workers, and your neighbors safe, and your site compliant.

4, 6, 8 inch and Drive-Over Spill Containment Berms are also available!

OUR 100% AMERICAN MADE SPILL BERM IS A COMPLETE TURNKEY SOLUTION:

1. **YOU MEASURE**
2. **WE DESIGN & FABRICATE**
3. **YOU INSTALL**

You won't need sophisticated tools either: a tape measure, impact driver, caulk gun, and a few other common tools.

See our install guide for more details.

Made in the USA

100% Recycled
Materials

Unrivalled
Quality

UV Resistant

2 INCH SPILL CONTAINMENT BERM
