

ROOFTOP PAVERS

Rubber membrane roofs can be a problem. They're difficult to maintain. They're treacherous to traverse on foot, particularly in the rain, ice, or snow. They also damage easily when exposed to harsh weather conditions, particularly when ice, snow, or other debris falls off broadcast dishes, antennas, water tanks, and other typical roof fixtures. RubberForm Rooftop Pavers make protecting or traversing a flat roof remarkably simple, especially in harsh weather.

Keep rooftops, work areas, and walkways protected from damage and safe for you and your workers.

KEY FEATURES:

SAFE

Provides a walkway for workers or customers traversing your roof

SIMPLE

To install, remove, and relocate

PROTECTION

Protects your roof from extreme weather damage (like falling ice, snow, or other debris from roof installations)

DURABLE

Won't crack, chip, crumble, or corrode

MADE IN THE USA

With 100% American recycled crumb rubber

Made in the USA

100% Recycled Materials

Unrivaled Quality

UV Resistant

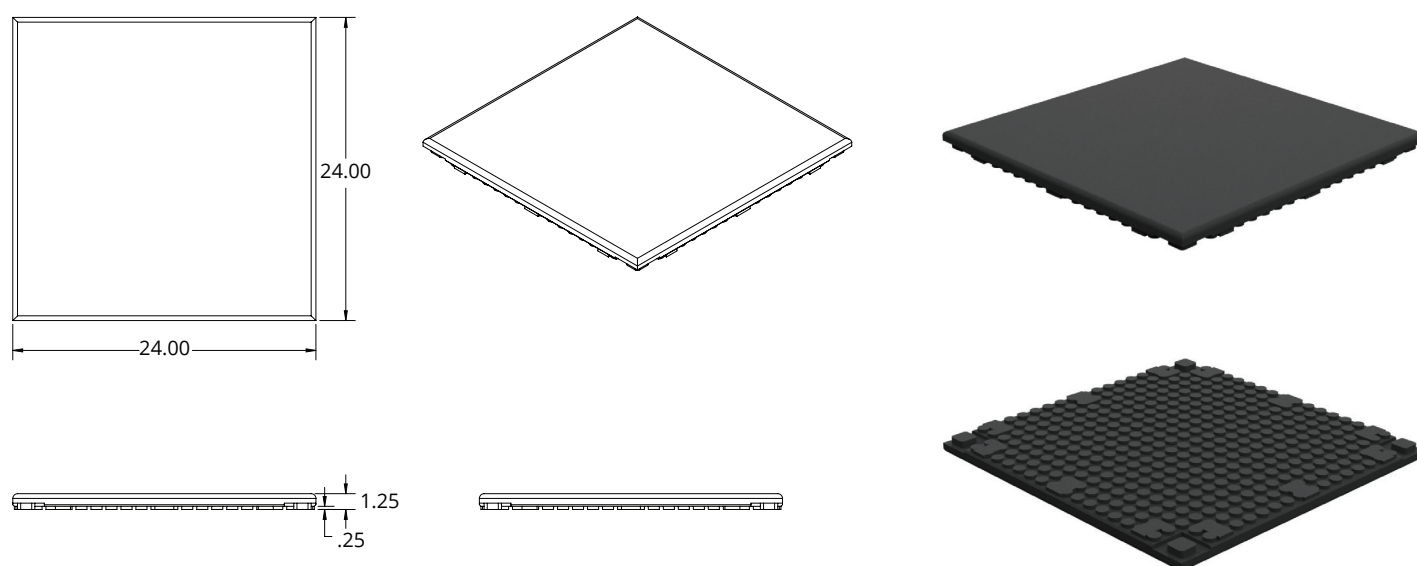

ROOFTOP PAVER SPECIFICATIONS

RF-RTP122 ROOFTOP PAVER

SPECIFICATIONS

- 24 in. W x 24 in. L x 1 in. H
- 18 lbs
- 1/4 in. round standoffs
- Channels underneath for easy drainage
- Safe for rubber membrane roof applications
- Available colors: Onyx Black, Storm Gray, & Gunmetal
- Other colors available upon request, minimum quantity required
- Resistant to extreme temperature variations, UV light and moisture
- Connect multiple pavers easily with connector block
- No adhesive needed (but can use if desired—contact our product specialist for more info)
- Made in the USA with 100% recycled crumb rubber
- Complies with ARRA 2009 and Buy America Acts

ADDITIONAL HARDWARE

- Paver Connector Block (made with recycled rubber)
- Chem-Link M1 Structural Adhesive – 10.1 oz cartridge, black, no VOCs
