

SH-36 IN. SPEED HUMP

Our RubberForm Speed Humps are effective permanent or temporary traffic calming devices. Speed Humps are **gentler** than speed bumps, so they create **less noise**, are **less likely to damage vehicles**, and also slow traffic down a little less than speed bumps would.

Our 100% American recycled thermoplastic Speed Humps are **easy to install** and just as simple to remove and relocate. They're modular 2 ft. increments, so they can be linked to span any width of road or parking lot. And they're so durable, they **won't crack, crumble, or corrode** in any heat, cold, rain, ice, or snow. And of course, they'll withstand heavy vehicle traffic.

KEY FEATURES:

Made in the USA

100% Recycled Materials

Increase LEED Score

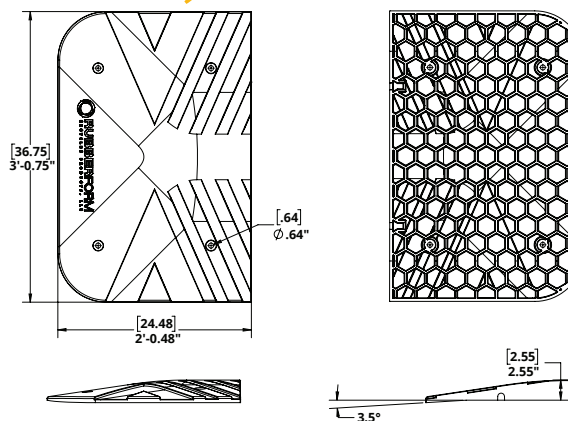

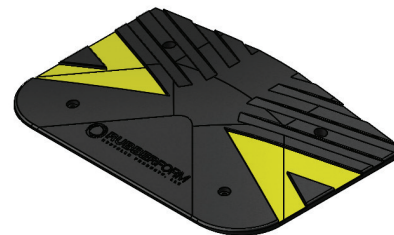

PARKING LOT SAFETY

SPEED HUMP (SH-36 IN.) SPECIFICATIONS

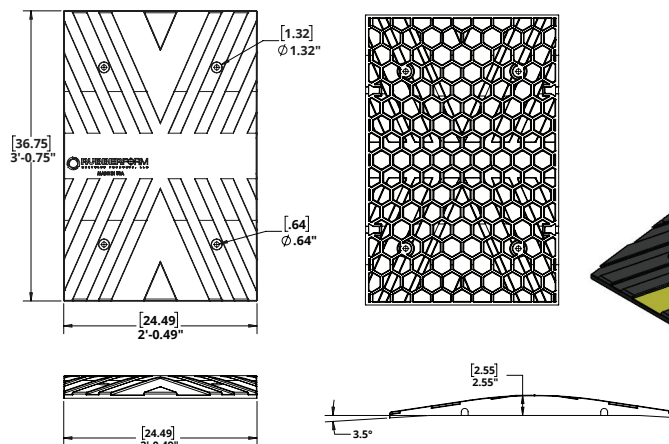

RF-SH36E

- 36 in. W x 24 in. L x 2.55 in. H
- 22 lbs

RF-SH36C

- 36 in. W X 24 in. L X 2.55 in. H
- 26 lbs
- Speed Hump Center Module
- Additional 24 in. center modules can be added for any length needed

36 IN. SPEED HUMP HARDWARE KIT:

- (4) 1/2 in. x 4 in. Lag Bolts
- (4) 1/2 in. x 4 in. Plastic Lag Shields
- (4) Washers
- (2) TPO Dual Flange Connector (Dog bone)

SH-36 in. Specifications

- Modular design for custom sizing
- Embedded thermoplastic reflective material for low-light conditions
- Made in the USA with 100% American recycled thermoplastic

SH-36 in. Key Features

- Easy to install, remove, and relocate
- Permanent or temporary speed zone – slow down speed from 15 to 20 mph or below
- Conforms to road curvature & any asphalt or concrete surface
- For added hardware mounting strength, use our two part mortar cement
