

RUBBER CURB RAMP

RubberForm's Rubber Curb Ramp is an efficient and sustainable alternative to cutting into curbs or as a replacement for temporarily laying down gravel or asphalt used to transition over curbs or access driveways during construction projects.

Made from post-industrial EPDM rubber, our curb ramps are the durable, long-lasting solution for temporary or permanent projects. They can be easily placed, removed, and relocated as needed.

Our Curb Ramp eliminates wasted ramp material costs, messy cleanups, lost time, and effectively pay for themselves after their first use. Create access ramps during road construction and help your company save time, money, and the environment.

Key Features

- Easy installation and transportation with built-in hand grips
- High load-bearing capacity
- Flexible - conforms to any asphalt or concrete surface
- Reusable and built-to-last
- Made in the USA with 100% post-industrial EPDM rubber

Made in the USA

100% Recycled Material
