

# WEDGE RAMP

RubberForm's Wedge Ramp is an efficient and sustainable alternative to cutting into curbs or as a replacement for temporarily laying down gravel or asphalt for transition over sunken pavement or other uneven surfaces during construction projects.

Made from post-industrial EPDM rubber, our wedge ramps are the durable, long-lasting solution for temporary or permanent projects. They can be easily placed, removed, and relocated as needed.

Our Wedge Ramp eliminates wasted ramp material costs, messy cleanups, lost time, and effectively pay for themselves after their first use. Create ramps during road construction and help your company save time, money, and the environment.

## Key Features

- Easy to install and transport
- Will not damage concrete, pavement, or tires
- High load-bearing capacity and safely absorbs impacts
- Resistant to temperature variations, UV light, oils/fuels, salts, and moisture
- Will not tear, chip, crack, or spall
- Made in the USA with 100% post-industrial EPDM rubber
